WORK EXPERIENCE

Bureau for Rights-Based Development (BRD) – Remote Technical Support

Jun. 2021 – Date

Key Duties and Contributions:

- Office 365 Administration (SharePoint Online).
- Microsoft Azure AD Support and Administration.
- Website Management.

International Energy Services Limited (Engr. Design Centre) – Lagos, Nigeria

IT Administrator

Jan. 2019 – Sep. 2021

IT Support Engineer

Jun. 2015 - Oct. 2017

Key Duties and Contributions:

- Supported over 300 employees spread across 3 major locations (Nigeria, Ghana and Paris), with cross-functional teams of engineers, lab scientists, business developers, expatriates and managers.
- Managed all in-house company servers, firewall and distributed network, ensuring security and data integrity through access controls, backups, and firewalls, maintaining a 99.9% uptime per annum.
- Administered Microsoft 365 workloads (Exchange Online, SharePoint Online, Teams), as well as all in-house computer infrastructure and ensured over 85% compliance with IT and organizational standards.
- Repeatedly set up and managed Microsoft 365 workloads that allowed for cross-organizational communication, collaboration and resource sharing, leading to the successful completion of several engineering projects worth over 100 million dollars in revenue.

- Reduced printer consumables and paper usage by 30% by designing and deploying a digitalized QR code incident report form for the organization's Health and Safety department.
- Co-authored usage manuals and co-administered end-user training on in-house enterprise applications achieving a 60% reduction in problem escalation and resolution.
- Improved business process efficiency and productivity by 45% across the entire organization by digitalizing tedious manual and repetitive in-house departmental processes using Microsoft 365 apps like Planner, To Do, Forms, SharePoint and Power Automate.

Cyberspace Networks Limited – Lagos, Nigeria

Technical Support Engineer

Aug. 2013 - Oct. 2013

Technical Support Intern

Mar. 2012 - Aug. 2012

Key Duties:

- Installed and configured WiMAX radios, SensaPhone devices and Fiber Optic network connections for new sites or clients and ensured installation standards were adhered to 100% of the time.
- Carried out site surveys for prospective clients requiring our services and submitted site reports after each visit.
- Frequently troubleshooted, optimized, and resolved faulty radio network connections, both on-site and remotely for over 150 clients at the time.
- Worked frequently in the Customer Service department on nights, weekends, and public holidays, responding to and resolving and closing all customer tickets within my shift, making sure to escalate when necessary.

EDUCATION

- **B. Eng. Information and Communication Engineering**, Covenant University, Ota, Ogun State. (2013).
